

Apple

2a.

Apple Inc. is a American multinational technology company which was founded by Steve Jobs, Steve Wozniak, and ronald Wayne. The headquarter is located in Cupertino, California. They develop and sell electronics such as Iphone's, Ipad's, Ipod's , Apple Watches, Computers, and many more. The company uses softwares in their devices including the ones in my project; Face ID, Safari, and iOS.

2b.

My developed process was only wikipedia and google images. That is where I found most of my facts. To find what Apple was I searched it up and used the first page which was wikipedia. To find what Face ID is I searched it up and went to the apple website and read the ways and how they make it work. To find what Safari is I also looked it up and used wikipedia. Lastly to find iOS i searched it i up and used wikipedia.

2c.

The beneficials of Face ID is that it helps protect your phone and unlock it when it recognizes your face. A harmful thing is that to open your phone you have to bring your phone up to your face so sometimes it looks bad because what if you are at a important meeting it will look bad. A beneficial of safari is that it is really good and you can search anything up . A harmful effect is that according to some people it takes a long time to open. A beneficial of iOS is that it helps and is really secure and does not let viruses out. A harmful effect is that you can mostly only do apple related stuff.
